Obituary – Miriam Witcomb

Last October we lost a beloved member of our District. Miriam Witcomb. Miriam was one of the nicest and kindest people you are ever likely to meet. She was a founding member of our welfare team at Heart of England and was always visiting or phoning members to see how they were. For many years she volunteered at Warwick hospital, so often we would find out about members being unwell because Miriam had seen them in the hospital. She also used to go once a month to a care home to run bingo sessions for the residents and only gave this up because of the Covid pandemic. She had been club president and was a wonderful waitress in the club on a Friday lunchtime for many years.

Miriam worked tirelessly to raise funds for every Provincial Grand Master's (Chairman) charity. She knitted novelties which she sold at Easter, Halloween and Christmas. Many of us still have various novelties she knitted and we bring them out each year. Near the end of her life she was still making knitted teddies for refugee children. Also she and her great friend Sue Dexter worked together on many tombolas. These would be at our annual Grand Draw events and in our local shopping centre and at local Christmas lights switch on. Miriam would ask how

many gifts we had for tombolas and when we told her she would always say “that’s not enough!”

Miriam was an integral member of our District and did so much for us and for our chosen charities, but she never liked to brag or be the centre of attention. If there was anyone who had Oddfellowship running through her, then it was Miriam. She was the kind of member and human being we should all aspire to be; kind, selfless, never saying an unkind word about anybody and working for the society and the members. She was and is greatly loved by those of us that knew her. She will be in our memories and our hearts for as long as we live. Rest in peace Miriam.

Society-funded cancer research on track

The Centre for Cancer Immunology, current beneficiaries of the Society's HA Andrews Memorial Fund, recently received its second donation instalment.

Nur updating AMC last year

The Centre, based at the University of Southampton, was chosen as the recipient of the £100,000 grant, split over three years, in 2022. The money is sponsoring the PhD studies of Nur Zainal, who is looking into a specific gene which it is believed can be manipulated to target cancer cells in a new vaccine.

Nur's first year

The first year of Nur's studies has been spent preparing for the execution of her PhD project over the next three years. She has been learning appropriate techniques, skills and procedures, as well as being introduced to theories and connecting with relevant research groups.

Nur, who travelled to the UK from Malaysia with her family to undertake the PhD, said: "I believe the invaluable experiences and knowledge I have acquired over the past year have equipped me to be a more productive and capable student.

"I would like to extend my heartfelt gratitude to the Oddfellows for their support in making my studies possible."

On the right path

Some of Nur's work on 3D cell culture – growing cancer cells in a way that more closely resembles the environment they experience in our bodies than traditional 2D cell culture – is included in a manuscript which will be published in a major international journal, for which she will be listed as a co-author.

Dr Tim Fenton, Associate Professor in Cancer Biology, says Nur has "excelled during her first year", adding: "We hope that Nur's studies will lead to improvements in the design of cancer

Dr Tim Fenton

vaccines, which is a key theme in the work being undertaken at the Centre for Cancer Immunology here in Southampton."

HA Andrews Memorial Fund

The Fund provides financial support to UK-based medical research projects or organisations. For more information about the Fund, and how you can donate, go to www.oddfellows.co.uk/ha-andrews

Our fantastic four

Congratulations to 2023's First Degree Course Educational Awards winners. George, Benedict, Jamie and Charlotte will each receive £3,600 over the next four years of their respective university courses to help ease the financial pressures of student life and create opportunities.

George LeBon

Heart of Norfolk
Branch member

George began his studies at the University of Southampton in September 2023 – a four-year course in Computer Science with Cybersecurity.

His dream job is to become a “white hat hacker”, which he explained is someone who is “hired by companies to try and hack into their databases and report back the vulnerabilities”.

He says he and his family were overjoyed to discover he'd be receiving the funding and has thanked the Society, adding: “It will go towards buying textbooks so I can enhance my knowledge further and better understand the industry that I want to work in.”

Benedict Weis

Leodis Branch member

Benedict hasn't yet decided what his ideal future job role might be. He is studying Aerospace Engineering at Queen's University Belfast and hopes a career path might become clearer over the next few years.

Since starting in September 2023, Benedict has joined the University's rowing club and the money will help him pay for training camps and trips, which he says will allow him to study more effectively without worrying as much about his finances.

“I would like to thank the Oddfellows for the award and just to say how grateful I am for it,” he said.

Jamie Messett

Loyal Lord Byron
Branch member

Jamie started his first of four years of Chemistry at the University of Oxford's Balliol College in October 2023, and will put the money towards

learning materials. He would like his future to be in the pharmaceutical industry, but a PhD and a career in research is also a potential avenue.

He said: "Nobody should underestimate how valuable funding can be towards determining how well a student performs.

"I would like to thank everyone involved in helping me with this award, and also everyone involved with providing the funding."

Charlotte Stevenson,

Pride of Woolwich
Branch member

Charlotte started her four-year course in Physics and Philosophy at the University of Oxford's Brasenose College in October 2023.

She is hoping to do a PhD in astrophysics and then continue researching within the field beyond that.

The funding will allow her to take part in unpaid research programmes during university holidays, covering the cost of travel, accommodation and food, as well as contributing to the cost of textbooks and other resources. She said: "This award will be an immense help throughout my degree and I'm so, so grateful to have received it."

Grand Master (Chairman) of the Society, Barbara Needham, said: "Ordinarily, we hand out three First Degree Course Educational Awards each year, but such was the strength of the applications of this year's winners that we felt they all deserved the financial boost. "I'm delighted for all four of them, and I wish them every success over the next few years at university and beyond."

Striving for a greener future

The Oddfellows is committed to being as green as possible. That’s why we’ve been calculating and offsetting our annual carbon footprint since 1 April 2020.

Between 1 April 2022 and 31 March 2023, 106.38 tonnes of CO₂e was recorded as being produced through the operations of our Liverpool and Manchester offices and associated transport activities, which includes our financial services brand, Unity Mutual.

Although this figure is up 5.4% on the previous year, benchmarked against employee numbers, carbon emissions have remained almost constant (up 0.2%).

The Oddfellows’ CEO, Jane Nelson, said: “Our focus is to keep learning through our assessments and to make incremental changes to the way we operate so we can bring our greenhouse gas emissions down and play our part in tackling climate change.”

The Society’s aim is to be Net Zero, where our carbon emissions are as low as possible. As a last resort, we have offset our 2022-23 carbon footprint by funding carbon dioxide-saving initiatives, including in Eritrea, Cambodia, Brazil, Bulgaria and India.

Jane added: “Climate change is real. It’s the greatest environmental challenge we’ve ever faced. But there is hope, because we can all do something about it.”

Investing in futures

Unity Mutual discovered a genuine interest in its children’s savings accounts – a topic many grandparents and parents hadn’t considered before – while at the 2023 Baby and Toddler Show in Manchester.

The Junior ISA (JISA), offered in partnership with Mini First Aid to include a free paediatric first aid course*, turned heads, especially when parents realised once they’d set it up, anyone could contribute.

Unity Mutual at the Baby and Toddler show

Unity Mutual’s Head of Sales and Marketing, Abi Jones, said: “No more brainstorming gift ideas for that first birthday or Christmas – a shared investment in a secure future sparked enthusiasm. Because, sometimes, the best gifts are the ones that grow over time.”
